Value Chain of Bunkering Biz

Service Area

Certification

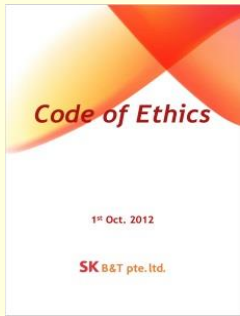

ISO 9001 Certificate

ISO 14001 Certificate

SK B&T tries to increase customer value through environmental and quality management activities, and fulfills its corporate social responsibility with regard to the environment.

SK B&T has acquired ISO 9001 certification to satisfy customers with quality assurance, and to manage our business systematically and efficiently.

Additionally, SK B&T has complied with regulations like MARPOL to prevent environmental pollution. As part of these efforts, SK B&T has acquired ISO 14001 certification to proactively respond to the ever tougher global environmental regulations.

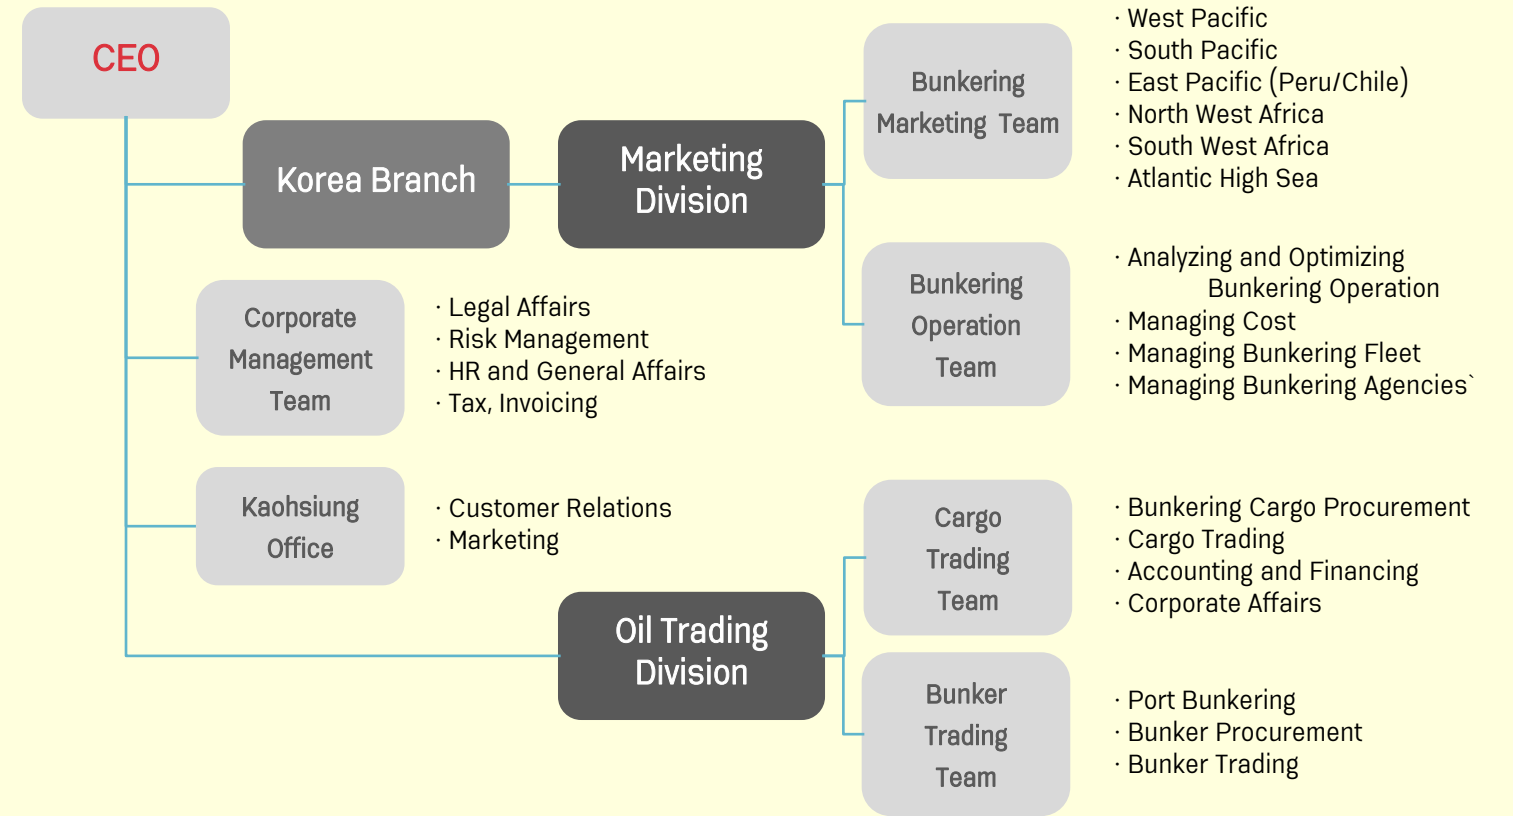

Code of Ethics

SK B&T shares 'ethics and morality' as a corporate mission, respects the system of free market economy and endeavors to achieve corporate missions by complying with laws and the spirit of the law.

To this end, the company strives to maintain all its management activities at the highest level of ethics by providing all employees of the company with a set of standards that serve as a foundation for sound decision making.

This Code of Ethics is applicable to the employees (regular worker, contracted worker, dispatched worker, specialty worker) and business partners.
